DATASERVICES

SUPERIOR GIS & ALI DATA MANAGEMENT SERVICES

Enable your GIS data for today's environment with accurate GIS or spatial data that will deliver the quality location validation and call routing necessary for NG911 migration.

DATA ASSESSMENT & ANALYSIS TOOLS

Our team will provide a basic initial assessment to identify potential areas of concern within your data. Utilizing 911Datamaster's SpatialStation®, an advanced GIS QA/QC analysis tool, provides state-of-the-art GIS QA/QC capabilities for GIS layer-specific reporting on data quality, completeness, and consistency with traditional 911 databases (ALI & MSAG).

GIS SUPPORT STAFF

Our GIS technicians can be subject matter experts for GIS data improvement projects when preparing for NG911. They can also provide ongoing support to fill your GIS data development needs or supplement your existing GIS staff.

DBMS & ALI

Utilizing 911Datamaster DataBond® DBMS and ALI applications which are both NENA NG911 transitional compliant Location Database (LDB), enables migration of your 911 system to NG911 with no changes to the underlying database eliminating the need for fork-lift upgrades.

PSAPS

Traditional PSAPs and NG-capable PSAPs can utilize the same database through a web-based user interface, ensuring that you always have access to your data.

MOTOROLA SOLUTIONS

DataServices focuses resources and prepares your GIS data for migration to NG911 environments, delivering a seamless transition to LDB and LVF/ECRF, handling today's transactions while preparing your data for the future.

IMPROVE QUALITY AND CONTROL COSTS BY LETTING US MANAGE YOUR ALI.

911Datamaster has over 25 years of experience with database management and ALI software. With hundreds of installations throughout the U.S. and abroad, we have developed a deep knowledge of database management. We offer a simple migration from your incumbent provider to a state-of-the-art, NG911-ready platform that can reside on your premises or in our hosted environment. Service providers will send service orders to this platform, where our analysts will help ensure data integrity. PSAPs can easily migrate to our geographically diverse ALIs with a few simple network changes.

Improving and managing your data quality today and positioning your organization for NG9-1-1 requirements, is our focus. With 911 Datamaster, **success begins before the call is made.**
